

Space Launch
Components

Leading Solutions

- Single-piece construction eliminates welds, reducing assembly times & inspection requirements
- Near-net forming reduces input mass & machining hours (less waste)

Our Competitive Difference

- Complete range of Engineering & Manufacturing Capabilities onsite
- Provides ability to control costs and scheduling
- Smaller lot sizes with a fast turnaround

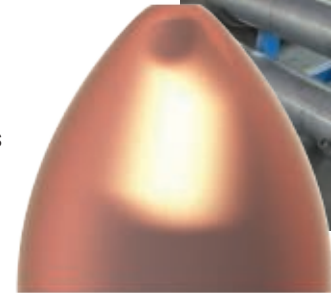

Manufacturing Capabilities

- Experience with Aluminum, Niobium, Copper, Inconel, Titanium, Stainless Steel & more

Sample Products

- **Pressure Vessels**
 - Liners, full & half
 - COPVs
 - Domes
 - Cryogenic liners
- **Engine Components**
 - Main Combustion Chambers
 - Engine Nozzles
- **Rocket Motor Cases**
